Bizbio Inc. acts as the Forensic Authenticator of this record. This audit was generated from the Platform-Sealed Truth Packet anchored to the Bizbio Ledger. TRUST STATUS: This document is cryptographically signed (PAdES). Any modification to this PDF will invalidate the digital seal (Look for the Adobe Blue Bar). Verification Source: [Internal Secure Escrow | Decentralized Immutable Archive | Client-Side Vault]

VERIFIED REALITY FORENSIC AUDIT

PLATFORM-SEALED TRUTH PACKET

General Metadata Audit (Deterministic)

TIMESTAMP

Thursday, September 17, 2026

MISSION ID

5aa5a81e-8172-44d3-a9a0-18dff03a8dbc

TARGET LOCATION

CASO Station, S t. Thomas, ON, CA

Platform-Sealed Truth Packet (SHA-256): a6234952d539619cd2d6e2766db965afeeca80ae52d715f603c0de45e1345bd8

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

COORDINATION STATUS & RULES OF ENGAGEMENT

COORDINATED: This mission was performed under a Client Warranty of Authority. The Verifier entered private property based on the Client's representation of legal access.

Prepared for: BK Bakker

Verified by: Independent Verifier #2a4c219a-c80c-40ca-a665-f9a510f8ce24

Forensic report ID

0e93de7f-5169-4950-8adf-fb8d9a778c54

Audit order

e9cfff29-8a3a-4a16-940a-ed025c7134cc

Audit type

general

Platform-Sealed Truth Packet (SHA-256)

a6234952d539619cd2d6e2766db965afeeca80ae52d715f603c0de45e1345bd8

Public proof gallery: Not available. This Platform-Sealed Truth Packet is not maintained in Bizbio Inc.'s active secure storage; no live public gallery URL is provided for this record (for example: deep-archive placement, retention-driven purge, or when this export is not tied to a resolvable truth packet id).

The Verifier is a third-party independent contractor. Bizbio Inc. warrants the integrity of the data transmission, but physical capture is performed autonomously.

ATTRIBUTION & RIGHTS NOTICE

- **Capture Proof File:** Owned by the commissioning party/verifier as an immutable record of physical reality.
- **Underlying Intellectual Property:** All copyright, trademarks, moral rights, and artistic ownership of the subject matter depicted remain 100% with the original creator/artist.
- **Platform Role:** Verified Reality Agency is a secure custodian of sensor telemetry under a limited key-escrow model (recovery, support, and lawful process where Bizbio can technically decrypt). It is not a no-keys or blind vault. The issuance of this cryptographic Truth Packet certifies physical capture provenance only and does not transfer, license, or encumber the underlying artistic property.

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

Bizbio Inc. acts as the Forensic Authenticator of this record. This audit was generated from the Platform-Sealed Truth Packet anchored to the Bizbio Ledger. TRUST STATUS: This document is cryptographically signed (PAdES). Any modification to this PDF will invalidate the digital seal (Look for the Adobe Blue Bar). Verification Source: [Internal Secure Escrow | Decentralized Immutable Archive | Client-Side Vault]

Independent Verifier Dossier

VERIFIER	**Name / role:** BK Bakker **Verifier ID:** 2a4c219a-c80c-40ca-a665-f9a510f8ce24
DEVICE & PRNU	**Device model:** Pixel 6 Pro **PRNU hash:** Pixel 6 Pro-SENSOR-43C4-Pixel 6 Pro-SENSOR-D94B-Pixel 6 Pro-SENSOR-93A0
TENURE & EXPERIENCE	**Active since (profile, UTC):** 10 July 2026 **Verified missions (platform tally):** 3

Verifier Attestation

> This Verifier has executed the VRA Independent Contractor Agreement (ICA) and the DIIA OpSec Addendum. By sealing this record, BK Bakker attests that the reality captured is an accurate, contemporaneous reflection of the physical environment, free from any attempt to spoof, fabricate, or misrepresent the subject matter. This attestation is cryptographically anchored to the Verifier's Platform Credentials and forms a permanent, immutable part of the forensic evidentiary record.

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

Bizbio Inc. acts as the Forensic Authenticator of this record. This audit was generated from the Platform-Sealed Truth Packet anchored to the Bizbio Ledger. TRUST STATUS: This document is cryptographically signed (PAdES). Any modification to this PDF will invalidate the digital seal (Look for the Adobe Blue Bar). Verification Source: [Internal Secure Escrow | Decentralized Immutable Archive | Client-Side Vault]

EXECUTIVE SUMMARY

Forensic Confidence Score 95/100 — deterministic evaluation from Command Centre Pillars of Truth (Desktop-matched penalty table). No large-language model was used for scoring. A small hardware-telemetry degradation adjustment was applied; cryptographic sealing and chain of custody remained intact. This audit is a deterministic calculation based on hard-coded cryptographic penalties. It represents a mathematical assessment of file integrity and hardware telemetry, removing the risk of algorithmic bias or generative hallucinations.

FORENSIC CONFIDENCE SCORE (DETERMINISTIC)

95 /100

Same deduction table as the Verified Reality Auditor Desktop App. Starting from 100; penalties apply per pillar below.

PILLAR / LINE	RAW DELTA	NOTES
Software Origin	0	No deduction
Device Integrity	0	No deduction
Session Integrity (The Sacred Seal)	0	No deduction
Temporal Integrity	0	No deduction
Chain of Custody (The Golden Thread)	0	No deduction
C2PA / Content Authority	0	No deduction
Hardware Degradation: Non-critical telemetry gaps detected. Cryptographic integrity and Chain of Custody remain fully intact.	-5	5 pts applied (Desktop parity table)

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

PILLARS OF TRUTH

PILLAR	STATUS	REASON CODE	REASON
Software Origin	Pass	SOFTWARE_ORIGIN_OFFICIAL	App signing hash matches HQ official release whitelist.
Device Integrity	Pass	DEVICE_PRNU_VERIFIED	PRNU / device fingerprint resolved (Pixel 6 ...).
Session Integrity (The Sacred Seal)	Pass	SESSION_SEAL_VERIFIED_CROSSCHECK	Cryptographic hashes verified within certificate and file inventory (session log and/or primary video vs declarations). Database metadata mismatch — internal seal valid. last_evidence_hash may reflect the outer ZIP digest while the certificate binds the last captured asset (rip_current_summit_verification_ev_2026-09-17t16-19-20-290z.mp4).
Temporal Integrity	Pass	TEMPORAL_DIGICERT_MATCH	DigiCert/TSA temporal integrity matches the Desktop Auditor rule. Desktop session-start branch: delta 5145690 ms, allowed 6816109 ms (session span 6756109 ms + 60000 ms slack).
Chain of Custody (The Golden Thread)	Pass	CHAIN_THREAD_AND_VAULT_OK	Golden Thread manifest chain and server vault hash check both pass.
C2PA / Content Authority	Pass	CONTENT_VRA_SELF_SIGNED	C2PA / content authority: Bizbio Inc. sovereign (self-signed) CA — expected for VRA; manifest present and treated as cryptographically valid.

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

STORAGE INTEGRITY (INFORMATIONAL)

Tier: OK — Durable copy verified: server SHA-256 matches seal reference for this packet.

Informational — storage tier does not change the numeric Forensic Confidence Score on Desktop.

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

CHAIN OF CUSTODY

Ingestion, sealing, and storage events for this mission (cross-reference with the Public Gallery).

EVENT	TIMESTAMP (UTC)	DETAIL
Mission ordered	Thu, 17 Sept 2026, 14:45:18 UTC	Request recorded on the platform.
Dispatched	Thu, 17 Sept 2026, 14:45:35 UTC	Mission released to the verifier network.
Verifier claimed	Thu, 17 Sept 2026, 14:46:01 UTC	Claimed by BK Bakker.
Platform seal (truth packet)	Thu, 17 Sept 2026, 16:42:06 UTC	Truth packet 2aa7b162… — cryptographic material: a6234952d539619cd2d6e276…
Storage integrity verified	Thu, 17 Sept 2026, 19:26:34 UTC	Server-side verification — status: verified.
Storage snapshot generated as of Thu, 17 Sept 2026, 19:26:54 UTC.		
Secure Vault (durable platform storage)	Thu, 17 Sept 2026, 19:26:34 UTC	Encrypted object retained under subscription / Secure Vault terms.
Certified report record	Thu, 17 Sept 2026, 19:26:36 UTC	Forensic report metadata timestamp tied to this export.

This **General Metadata Audit** is a deterministic record produced by aligning server-side ledger data with the Platform-Sealed Truth Packet. Forensic Confidence Score deductions, Pillar statuses, and cryptographic inventory rows are computed with the same mathematical rules as the Verified Reality Auditor Desktop App; this export does not add AI interpretation of raw media.

ZERO-VARIANCE CRYPTOGRAPHIC LEDGER ATTESTATION: This General Audit is a purely deterministic export derived from hardware-attested telemetry, sensor metadata, and Platform-Sealed Truth Packet ledger logic. Every finding is a direct mathematical result of internal integrity checks and PRNU-hardware fingerprinting, with no automated macro-synthesis layer applied. **DATA RESIDENCY DISCLOSURE:** Bizbio Inc. acts as the Forensic Authenticator. While the cryptographic hash of the Truth Packet is permanently anchored to the Bizbio Ledger, the physical media (video/images) may have been purged, moved to decentralized storage (Arweave), or returned to a Client-Side Vault per the Secure Custodian MSA.

Bizbio Inc. acts as the Forensic Authenticator of this record. This audit was generated from the Platform-Sealed Truth Packet anchored to the Bizbio Ledger. TRUST STATUS: This document is cryptographically signed (PAdES). Any modification to this PDF will invalidate the digital seal (Look for the Adobe Blue Bar). Verification Source: [Internal Secure Escrow | Decentralized Immutable Archive | Client-Side Vault]

REPORT

This General Metadata Audit was generated by the deterministic engine. Pillar statuses and the Forensic Confidence Score use the same mathematical deductions as the Verified Reality Auditor Desktop App.

Platform-Sealed Truth Packet (SHA-256): a6234952d539619cd2d6e2766db965afeeca80ae52d715f603c0de45e1345bd8
